What is Fast Tomato

Fast Tomato is an award winning career planning and management tool designed to help all young people aged 13 - 19 years old with their career decisions. Through a series of online questionnaires the individual can explore themselves and their career ideas as well as different educational and work or training based option choices. It has been created and developed by the Morrisby Organisation; one of the largest providers of careers advice and guidance in the UK.

Fast Tomato is an education and guidance system accessed via the web for Years 9 and above, helping them to make those big decisions regarding their education and careers.

It provides high quality information on courses, and aims to promote better learner decisions by providing young people with personal insights, and all the relevant information they need, to plan and develop their future in terms of jobs, education and careers.

When will I start Fast Tomato?

You will begin the process in Year 9 and can continue to use the system until you leave full time education. You will be given a unique login passcode to allow you on to the system and will be guided through the different topics during Life Skills.
