# Parental controls on the IPad

1. Open the settings app and go to general then restrictions.

2. Tap on it and Enable Restrictions where you will be prompted to enter and re-enter a four number passcode; this will allow you access to enable or disable restrictions
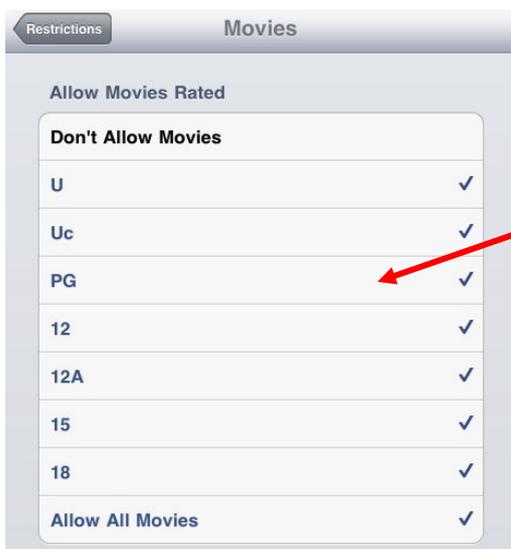

3. Fine-tune restrictions to your location as well (closest equivalent is UK ratings)

4. You can restrict music, music videos and podcasts containing explicit material.

5. You are able to control movie ratings as well as set parental ratings on TV

Every time you want to make changes to the restriction panel, you will need to enter your four number passcode again.
